

**GRADUATION PROJECT – I or II
MIDTERM OR FINAL REPORT**

PROJECT TITLE

PROJECT TEAM:

PROJECT ADVISOR:

ABSTRACT (min 1000 characters)

Keywords:

1. INTRODUCTION (min 5000 characters)

--

2. REALISTIC CONSTRAINTS AND CONDITIONS

2.1. Sustainable Development Goal (min 1000 characters)

Discuss the relationship between your project topic and the sustainable development goal you chose in section 13.

--

2.2. Effects on Health, Environment and the Problems of the Age Reflected in the Field of Engineering (min 1000 characters)

Discuss the impact of your project on health, environment and safety in universal and social dimensions and the problems of the age reflected in the field of engineering.

--

2.3. Legal Consequences (min 1000 characters)

Discuss the legal consequences of your project.

--

3. LITEARTURE ANALYSIS (min 8000 characters)

Perform a literature analysis on your project topic to summarize the state-of-the-art in the field. Explain similar applications. Use proper in-text citations and list them in the references section.

--

4. STANDARTS TO BE USED (min 1000 characters)

Explain the engineering standards you plan to use in the development of your project.

--

5. APPROACHES, TECHNIQUES, AND TECHNOLOGIES TO BE USED (min 6000 characters)

--

6. PROJECT SCHEDULE AND TASK SHARING

WP No	Work Package Name	Assigned project staff	Time Period (... Week)	Success Criteria
1				
2				
3				
4				
5				
6				
7				

7. RISK MANAGEMENT

WP No	Risks	Risk Management (Plan B)
1		
2		
3		
4		
5		
6		
7		

8. SYSTEM REQUIREMENTS ANALYSIS

8.1. Use Case Model (min 3000 characters)

Use case model (or functional model) describes the main actors of the system and their main use cases with a UML use case diagram.

8.2. Object Model (min 3000 characters)

Object model describes the main objects in the system and their relationships with the help of a UML class diagram.

9. SYSTEM DESIGN

9.1. Software Architecture (min 2000 characters)

Describe the decomposition of your system into subsystems. Use a UML component or package diagram to show your SW architecture.

9.2. Hardware Architecture (if exists)

9.3. Persistent Data Management (if exists)

Persistent data management describes the persistent data stored by the system and the data management infrastructure required for it. This section typically includes the description of data schemes, the selection of a database, and the description of the encapsulation of the database.

10. SYSTEM TEST DESIGN (min 5000 characters)

Design a test to evaluate your system. The test design depends on the project topic (Some possibilities: user evaluation, surveys, performance tests, unit tests, etc.)

11. DISCUSSION OF THE RESULTS (min 3000 characters)

Summarize your study. Discuss the quantitative results obtained by the test you performed in Section 9.

12. REFERENCES

13. CHOOSE INTERDISCIPLINARY DOMAIN OF YOUR STUDY

Choose an item.

14. CHOOSE SUSTAINABILITY DEVELOPMENT GOAL OF YOUR PROJECT

Choose an item.

15. SIMILARITY REPORT

The similarity report obtained from Turnitin should be attached to the final report. The required actions will be announced later.
